Mobile (Xamarin) Developer

With Open as App, you can turn spreadsheets, databases, and dashboards into apps, websites, and chat bots - within minutes. No coding required.

Sharing complex things the easy way – That's our mission. Join us today!

What we offer

- Leave a footprint! We are a young startup – Be part of a dynamic, quickly growing & international team
- Grab the chance to take responsibility and bring your own ideas to the table
- Work with state-of-the-art technologies: Cross platform native apps, Azure Cloud, AI, machine learning, chat bots, voice interfaces, and modern web technologies
- Work on an award-winning product that is used by big enterprises like Telekom, Deutsche Bahn, or Commerzbank
- A great office space in the heart of Munich (Karlsplatz/Stachus) with loads of social events and free coffee & beer
- Work in an agile development team that knows more about Scrum than 'Daily Standups'
- Flexible working hours & home office combined with an attractive salary
- A healthy work life balance. We know how important family & friends are!

Your tasks

- Work on our end user cross platform Xamarin app (iOS, Android, UWP)
- Combine Xamarin forms with native elements to maximize User Experience and maintainability
- Be part of a full Scrum environment with two week sprints
- Integrate new technologies into your work, collaborate closely and share knowledge with your colleagues

Your profile

- Experience in mobile app development using Xamarin.Forms, Xamarin.iOS, Xamarin.Android or Windows UWP
- You are experienced with C#
- Experience using XAML (Windows 8/10; Xamarin.Forms preferred)
- REST APIs, XML, Json and SQL are familiar topics to you
- Experience with MVVM architecture
- Knowledge of software engineering concepts such as object-oriented programming, clean code, unit testing, design patterns and dependency injection
- Fluent in English, German is a plus
